In addition, the Q1 and Q2 typewriting is suitable for comparison with corresponding known typewriting should a suspect typewriter be located. Typewritten exemplars should be on individual slips of unlined paper similar in size to the questioned items and include at least three repetitions of the questioned typewriting and all characters on the keyboard.

The postal stamp on Q1 was removed from a booklet pane of stamps and is suitable for comparison should the adjoining stamp(s) be located.

The cut edge on specimen Q2 is suitable for comparison should the suspected complimentary portion of Q2 be located.

No watermark or indentations of value were observed on specimens Q1 and Q2 which would further assist in determining their immediate origin.

Specimens Q1 and Q2 were searched through the Anonymous Letter File with negative results. Copies of these specimens will be added for future reference purposes.

Remarks:

You will be separately advised regarding the results of the requested Latent fingerprint examination and the disposition of the submitted evidence. Photographs are retained.
